

SUSTAINABILITY STATEMENT

Rob Lawes Entertainments Ltd
Updated January 2026

Statement of Purpose & Values

In alignment with our mission to deliver exceptional wedding entertainment experiences, Rob Lawes Entertainments Ltd is committed to operating responsibly and sustainably. We recognise the urgency of climate change and the importance of reducing our environmental footprint while continuing to provide premium service to our couples and venue partners.

As a modern, forward-thinking events company, our core values are embedded in our operations:

- We act with integrity and honesty at all times.
- We believe in transparency and measurable reporting.
- We respect the natural environment and the communities we operate within.
- We prioritise clear communication with venues, clients and suppliers.
- We strive for sustainable growth that balances economic, environmental and social responsibility.
- We commit to continuous self-evaluation and improvement.

We recognise environmental, social and economic factors as the three pillars of sustainability and consider all three in strategic decision-making.

Scope & Commitments

Rob Lawes Entertainments Ltd is committed to continual improvement in sustainability performance.

Our baseline emissions for 2025 were calculated at 0.86 tCO₂e across 100 weddings, equating to 0.0086 tCO₂e per event delivered.

Our emissions primarily arise from team travel and home office electricity usage. The installation of solar panels at our home office significantly reduces reliance on grid electricity and contributes to lowering Scope 2 emissions.

Our objectives include:

- Reducing travel emissions per wedding by 15 percent by 2030.
- Increasing electric and hybrid vehicle usage across our DJ team.
- Maintaining paper-free digital booking systems.
- Conducting annual emissions recalculations and publishing updates.
- Prioritising emissions reduction before considering carbon offsetting.

We communicate our sustainability commitments to venues and couples and support industry-wide improvement by aligning with venues that uphold strong environmental standards.

Social & Industry Responsibility

We recognise that sustainability extends beyond carbon measurement.
As an employer and service provider, we:

- Work with a trusted network of professional DJs and suppliers.
- Promote responsible business conduct across our team.
- Operate fair and transparent pricing structures.
- Encourage sustainable decision-making among couples where appropriate.
- Maintain long-term venue relationships built on trust and accountability.

We actively monitor our carbon emissions to ensure our reduction targets remain achievable
and that progress is accurately measured year-on-year.

This Sustainability Statement supports and sits alongside our formal Sustainability Policy and Carbon Reduction Plan, which are publicly available upon request.
